

Evolution Dog Training Tips

Potty Training Quick Tips

Potty accidents are no fun to deal with, but let's take a look at some considerations and tips to get you off on the right paw.

Things to consider:

1. Puppies don't have the physical or mental capacity to get it right away
2. Dogs are not capable of formulating elaborate plans to spite you
3. Medical issues can cause potty issues, such as pain, disease or anxiety etc
4. Scent and play can trigger potty
5. They can get confused about when and where to go, or they don't have easy access

Quick Tips:

1. Set a schedule and stick to a routine so you can help them learn
2. Reward good potty habits
3. Don't punish them for potty accidents
4. Give them time to learn and grow
5. Keep them in a pen when not supervised

Potty Training is complex and can take longer than we want. reach out to us if you've tried and are still having troubles.

Wishing you a paws-itively tail-wagging day!
