

Evolution Solution Reactivity Rehabilitation Program

Transformation Process

Our Reactivity Rehabilitation Program is designed to provide the coaching, knowledge, and skills needed for you to have more successful outings and more peaceful interactions with environmental triggers, using our tried and true structured program. We use only humane training methods, no pain, fear, force, harsh tools or cruelty is used.

Program highlights:

- We bust common myths and advice that tend to make reactivity worse
- A thorough assessment is completed to set our rehabilitation roadmap
- You receive all of the info you need to fully understand the anatomy of reactivity, the root causes, and how this behavior develops in the first place.
- Step-by-step coaching to teach you how to start down the path to improved behaviors
- Hands-on demonstration by your trainer who has extensive, real-world experience and specialized education to support ethical methods for

training without force or punishments.

- 3-6 Month program is flexible to the learning pace of the dog and humans
- Recommended training tools are provided

This is the program you'll want to choose if you're dealing with reactivity in the car, on the leash, in the yard, or in other explosive moments where your dog is triggered by something and then becomes out of control with behaviors such as barking, lunging, not able to be controlled, aggressive toward triggers and other related behaviors.
